

Nero — multifunctional package for working with CD and DVD drives

The program Nero has a pretty impressive functionality designed to create edit audio and video playback reading record or copy information from disks. Table of contents Size 55 MB | Downloaded 3855 times | Type of exe file | Version 9.4.12.3 Size 311 MB | Downloaded 1786 times file Type exe Nero includes several applications, each of which is responsible for their individual functions. Among them The only drawback of this program is quite high system requirements. Obsolete computer equipment it may show comparatively low productivity. Free Nero analogues are They all work with virtual images, and support recording on DVD and CD discs. But still Nero is the most powerful software, which opens up the most opportunities. After you download and run the program on the computer, a window will appear with a simple and intuitive interface. There are a large number of settings designed for different types of disk drives. Most often the application is used for burning discs. After startup the user is prompted to select the type of disc project the image of videos, music, etc.. Select the type of project You can open the panel with additional settings where there is a choice of the working actuator display information, etc. After the device type is selected a window appears with the Add button, and then will need to select any required files from Windows Explorer. Adding files Below you can see the scale size. If it's full recording is not possible. In the program there are functions of setting speed records and check the integrity of files. In addition to recording the data using this set of programs can be done and a lot of other processes to create a slideshow and import files, and more. . File Nero powerful multimedia complex with a very broad functionality for working with data on disks. Your e-mail will not be published. Required fields are marked Very long searched where it is normally possible to download the program managed only on this site the program the fire just always use and suggest all the Website now I will use constantly and often there are no annoying advertisements A good site I would even call it a magic chest programs. Here just downloaded the normal Nero. The program is useful if you want to create a disk image copy to record or even to mount the video. You can of course download the casino without any supplements if you do not need to use other tools Nero burn. However, the full version is quite useful for those who works a lot with video records
