

The Department of neurosurgery of hospital of an emergency medical service of the city of Ufa organized in 1992.

The Department of neurosurgery of hospital of an emergency medical service of the city of Ufa organized in 1992. It is planned and emergency specialized care to adult population of the city of Ufa as well as many areas of Bashkiria. The Department operates 60 beds consists of two posts. Common chamber is designed for five patients. In addition, the Department has eight chambers increased comfort one ward for patients with severe brain pathology is usually transferred from neuroresuscitation. For patients who are seriously ill attached a separate post on running a nurse with skills in the intensive care unit. Each bed is provided with call button connected to the remote alert being on both posts. The Department employs 13 doctors including 1 with the top 8 from the first 6 categories of doctors have a degree of candidate of medical Sciences. The main directions in the development of neurosurgical services at our clinic selected neuro Oncology cerebrovascular pathology of degenerative diseases of the spinal injury. When planning any operation priority for each case are minimally invasive techniques. This is achieved by planning minimal-optimal approaches through which it is possible to the main stage without harming the surrounding tissues. In the neurosurgical Department research work is conducted on the surgical treatment of hemorrhagic strokes, degenerative diseases and injuries of the spine at all levels, together with the research Institute. Mechnikov experimental studies on prevention of intracranial pyo-inflammatory complications and also in the field of neurotransplantation. Works closely with the departments of neurology, Institute of traumatology and orthopedics of the Bashkir state medical University. 2011 © Neurosurgical office of hospital of an emergency medical services in the city
